

SHRUBS

Hazelnut, American
(*Ytilia americana*)

Mature Height: 6-12 feet
Growth Rate: fast
Growth Habit: upright to rounded, multi-stemmed
Cold Hardiness: good
Drought Resistance: good
Fruit: small edible nut
Fall Color: copper-red
Pests: leaf spot, caterpillars, blight
Other: suckers

Cherry, Black
(*Prunus serotina*)

Mature Height: 25-50 feet
Growth Rate: fast
Growth Habit: oval crown, dense
Cold Hardiness: good
Drought Resistance: good
Flower Color: showy white flowers
Fruit: purplish-red fleshy edible berries
Pests: tent caterpillars
Other: yellow to orange fall color

Sumac, Smooth

(*Rhus glabra*)

Mature Height: 5-15 feet
Growth Rate: slow
Growth Habit: upright, stout, branching
Cold Hardiness: good
Drought Resistance: fair
Wildlife Value: nesting, escape cover
Fruit: red clusters
Fall Color: showy red
Other: suckers profusely

Willow, Sandbar

(*Salix interior*)

Mature Height: 5-10 feet
Growth Rate: fast
Growth Habit: rounded, wispy stems
Cold Hardiness: good
Drought Resistance: poor
Wildlife Value: dense thickets provide cover
Pests: cankers, aphids, galls
Other: suckers profusely, useful in riparian plantings

Pear, Ussurian

(*Pyrus ussuriensis*)

Mature Height: 15-30 feet
Growth Rate: medium
Growth Habit: upright and dense
Cold Hardiness: good
Drought Resistance: good
Wildlife Value: food and nesting
Flowers: faintly pink in bud, finally white
Pests: possible rabbit injury
Other: used in farmstead and field windbreaks and riparian plantings

Buckeye, Ohio

(*Aesculus glabra*)

Mature Height: 20-40 feet
Growth Rate: medium
Growth Habit: dense, broad oblong crowns
Cold Hardiness: good
Drought Resistance: poor
Wildlife Value: nuts eaten by wildlife
Fruit: light brown husk with dark brown, glossy nut
Pests: susceptible to leaf scorch, leaf blotch
Other: palmate compound leaves

SMALL TREES

Apricot, Manchurian

(*Prunus armeniaca*)

Mature Height: 10-20 feet
Growth Rate: fast
Growth Habit: spreading
Cold Hardiness: good
Drought Resistance: good
Wildlife Value: nesting site for songbirds
Flowers: almost white to pink
Fruit: peach-like drupe best suited for preserves

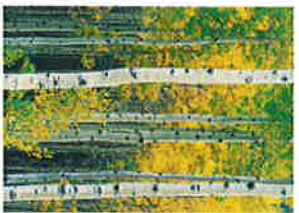

TALL TREES

Aspen, Quaking

(Populus tremuloidea)

Mature Height: 25-60 feet
Growth Rate: fast
Growth Habit: rounded crown with brittle branches
Cold Hardiness: good
Drought Resistance: poor
Wildlife Value: grouse utilize male buds for food
Bark Color: chalky white to olive-gray
Pests: canker, stem decay
Other: suckers, not shade tolerant

Chokeberry, Black

(Aronia melanocarpa)

Mature Height: 5-8 feet
Growth Rate: medium
Growth Habit: multi-stemmed
Cold Hardiness: good
Drought Resistance: good
Wildlife Value: nesting
Fruits: dark purple-black clusters
Fall Color: reddish-orange foliage
Other: fruit makes good wine, juice, and preserves

Birch, Paper

(Betula papyrifera)

Mature Height: 30-55 feet
Growth Rate: medium
Growth Habit: oval to rounded at maturity
Cold Hardiness: good
Drought Resistance: poor
Wildlife Value: food for birds and mammals
Bark color: smooth, papery white
Pests: bronze birch borer if trees are stressed
Other: nice landscape tree

Cranberry/bush

(Viburnum trilobum)

Mature Height: 8-12 feet
Growth Rate: medium
Growth Habit: round-topped, fairly dense
Cold Hardiness: good
Drought Resistance: fair
Wildlife Value: fruit eaten by a variety of birds
Flowers: white, scarlet fruit color
Pests: occasional dogwood borers
Other: excellent orange-red fall color

Linden, American (Basswood)

(Tilia americana)

Mature Height: 50-70 feet
Growth Rate: medium
Growth Habit: becomes rounded when mature
Cold Hardiness: good
Drought Resistance: poor
Wildlife Value: flowers preferred by bees
Flowers: creamy white to pale yellow
Pests: possible rabbit injury
Other: native east of the Missouri River

Elderberry

(Sambucus canadensis)

Mature Height: 6-10 feet
Growth Rate: fast
Growth Habit: multi-stemmed, open, spreading
Cold Hardiness: good
Drought Resistance: good
Flowers: large white clusters
Wildlife Value: food source
Pests: cankers, leaf spots, borers

Larch, Siberian

(Larix sibirica)

Mature Height: 30-60 feet
Growth Rate: medium
Growth Habit: spreading, lateral branches
Cold Hardiness: good
Drought Resistance: good
Wildlife Value: nesting for songbirds
Pests: leaf rust
Other: needles turn attractive yellow and are shed each fall

False Indigo

(Amorpha fruticosa)

Mature Height: 8-12 feet
Growth Rate: slow
Growth Habit: upright
Cold Hardiness: good
Drought Resistance: fair
Wildlife Value: dense cover
Flowers: bluish-purple clustered spikes
Pests: rust, leaf spot, powdery mildew
Other: native legume, good for streambank plantings
